

This Guide will show you the steps to install your new splashPB trigger in the PE Etha 2

- 1) Using a small punch or tool tap the Metal Pin out that is holding the trigger.

2) Pull the metal Pin out

3) Install New Trigger and put the Pin back in the same way it was taken out.

4) Make sure that the Pin is flush with the Plastic and Put all of the original adjustment screws into the New trigger and Adjust them to your liking and Enjoy!!
